

HMS COVID Decision Chart

	Positive Cases	Close Contacts	Household Contacts
Toddler Community (unvaccinated)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Quarantine 5 days from last exposure, return day 6 with a negative test	Quarantine 10 days from the last family members positive test, return symptom-free on day 11 if symptom free with a negative test
Toddler Community (vaccinated)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Test to Stay: submit negative test result each morning prior to attending school for 10 days following last exposure	Continuous Exposure: Quarantine 5 days from last family members' positive test, return symptom-free on day 6. Test to Stay days 6-10. Non-continuous exposure: Continue attending, monitor for symptoms, test to stay for 10 days beyond last date of exposure
Toddler Community (COVID positive in the last 90 days)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Continue attending, monitor for symptoms, test for extra precaution	Continue attending, monitor for symptoms, test for extra precaution
Children's House (unvaccinated)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Test to Stay: submit negative test result each morning prior to attending school for 5 days following last exposure Mask required for 10 days	Quarantine 5 days from last family members' positive test, return symptom-free on day 6. Test to Stay for days 6-10. Mask required for 10 days from last exposure
Children's House (vaccinated)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Test to Stay: submit negative test result each morning prior to attending school for 5 days following last exposure Mask Required for 10 days	Continuous Exposure: Quarantine 5 days from last family members' positive test, return symptom-free on day 6. Test to Stay for days 6-10. Non-continuous exposure: Continue attending, monitor for symptoms, test to stay for 5 days beyond last date of exposure Mask Required for 10 days from last exposure
Children's House (COVID positive in the last 90 days)	Isolate 10 days from start of symptoms or positive test, return day 11 symptoms improved and two negative antigen tests 12 hours apart	Continue attending, monitor for symptoms, test for extra precaution Mask required for 10 days	Continue attending, monitor for symptoms, test for extra precaution Mask required for 10 days

HMS COVID Decision Chart

- Red text indicates a need to isolate or quarantine, black text indicates that the child may continue attending school
- A positive case in the last 90 days exempts all close contacts and household contacts from quarantine and test to stay unless currently positive and in isolation
- A person is considered “vaccinated” two weeks after receiving the last shot in their series (must submit proof of vaccination)
- When testing daily, results should be emailed to both admin and Guide
- A negative test to return after **quarantine** must be either a PCR or two negative antigen taken 12 hours apart.
- A negative test to return after **isolation** must be two negative antigen tests taken 12 hours apart. **NO PCR.**
- Exposure is considered the last day of contact to someone that tests positive for COVID.
- For continuous exposure, last date of contact is 5 days from last family member’s positive test PLUS 5 additional days.
- Continuous exposure is when the positive family member is **not** isolating away from the child and they share any home space, including bathrooms.
- In order to be considered non-continuous exposure the positive family member must be completely isolated from the child, either in a separate home or not sharing any household space, including bathrooms. Masking when around the child does not count.
- **Test to Stay:** submit negative test result each morning prior to attending for 5 days from last exposure to last positive contact. Toddlers must test to stay for 10 days from last exposure because they can’t mask.
